

Environmental load of snowmobile compared to a car

Affects on the Environment

- For example in Yellowstone (U.S.A) in winter there are 16 times more Snowmobiles than cars. And they contribute up to 90% of the total hydrocarbon emissions there. Also they produce a lot of noise pollution.
- Snowmobiles can also cause damage to the mammals living beneath the snow.
- Snowmobiles can also cause damage to wildlife because they are scared of the sound so they leave their territory

Emissions of snowmobiles different engines

480g/km Co2

Lynx Xtrim RE 800 E-TEC (2-Tahti)

- Yhdelle hengelle

- Polttoaineen kulutus n.15-25 L / 100 km

240g/km Co2

Lynx Adventure 600 ACE (4-Tahti)

- Yksin tai kaksin ajavalle

- Polttoaineen kulutus n. 10 L / 100km
